## Description

The MADL-011012 is a lead-free surface mount, high power limiter which integrates the equivalent of 20 PIN, Schottky, limiter diodes, capacitors, inductors, and resistors in a compact ceramic package. This device provides superior low and high signal performance from 0.3 - 1.0 GHz without DC bias.

The MADL-011012 is ideally suitable for higher peak and CW power receiver-protector microwave circuits applications where higher performance surface mount limiter assemblies are required.
