MA4E2054 Series

Features

- Low $I_R$ (<100 nA @ 1 V, <500 nA @ 3 V)
- Designed for High Volume, Low Cost Detector & Mixer Applications
- High Detector Sensitivity: -55 dBm TSS
- Low Capacitance: 0.30 pF
- Low 1/f Noise
- Single, Series Pair, and Unconnected Pair Configurations
- Lead Free
- RoHS* Compliant
- Tape and Reel

Description and Applications

The MA4E2054 series are low barrier N-type silicon Schottky diodes assembled in surface mount plastic packages. They are designed for use as high performance mixer and detector diodes.

The MA4E20541-1141T (SOD-323), MA4E20541-1279T (SC-79) and MA4E2054A1(SOT-23) are single element Schottky diodes characterized for use as single ended mixers and detectors. The MA4E2054B1 and MA4E2054D1 (available in both the SOT-23 and SOT-323 packages) incorporate two Schottky chips in series pair configurations. These diodes are useful for balanced mixer and detector voltage doubler circuits.

Applications for the MA4E2054 series include VSAT and DBS mixers. The small diode package size and low cost make them attractive for use in RF tag applications for identification and toll collection.

Configurations (Top View)

1. The part number consists of the base chip (MA4E2054), followed by the wiring configuration (A, B, D, omit for SOD-323), the package style (287, 1141, 1146) and a “T” for tape and reel.

1. Restrictions on Hazardous Substances, compliant to current RoHS EU directive.

MACOM Technology Solutions Inc. (MACOM) and its affiliates reserve the right to make changes to the product(s) or information contained herein without notice. Visit www.macom.com for additional data sheets and product information.
