Miniature Broadband Gain Stage
70 - 3000 MHz

Features
- Low Noise Figure
- High IP3
- Single Supply +3 V, +5 V
- RoHS* Compliant SC70-6LD Package

Description
M/A-COM Technology’s MAAL-009120 broadband gain stage is a GaAs MMIC amplifier in a lead-free SC70-6LD (SOT-363) surface mount plastic package. The MAAL-009120 employs a monolithic 1-stage self-biased design featuring a convenient 50 Ω input/output impedance that minimizes the number of external components required. Its broadband design provides usable performance from 500 to 3000 MHz.

For operation below 500 MHz contact M/A-COM Tech’s application group for support.

Ordering Information 1,2

</tbody>
</table>

3. Exceeding any one or combination of these limits may cause permanent damage to this device.
4. M/A-COM Technology does not recommend sustained operation near these survivability limits.
5. Operating at 5 volts with no drain resistor will require the RF output power to be no greater than 10 dBm.

Recommended PCB Configuration @ 3V, 5V

Handling Procedures
The following precautions should be observed to avoid damage:

Static Sensitivity
Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these devices.
Typical Performance Curves: $V_{DD} = 3$ V

- **Gain**
- **Input Return Loss**
- **Output Return Loss**
- **Noise Figure**
Typical Performance Curves: \( V_{DD} = 3 \) V

**Output IP3, Input Power @ -12 dBm**

**P1dB**

**Current**

M/A-COM Technology Solutions Inc. (MACOM) and its affiliates reserve the right to make changes to the product(s) or information contained herein without notice. Visit [www.macom.com](http://www.macom.com) for additional data sheets and product information.
Typical Performance Curves: $V_{DD} = 5 \text{ V}$

6. This device can run from a single 5 volt supply, but for 1M hour MTTF the output power must be no greater than 10 dBm unless using a series resistor on the drain. See Application note 7 on page 7.
Lead-Free SC70-6LD (SOT-363)†

† Reference Application Note M538 for lead-free solder reflow recommendations.
Meets JEDEC moisture sensitivity level 1 requirements.
Plating is 100% matte tin over copper.
5 Volt Application Section for operation above 10 dBm output power

6. The addition of a 24.9 Ω series resistor on the drain line allows for 5 volt operation above 10 dBm output power, but no greater than 22 dBm of output power.
