MAAL-010200

Miniature Broadband Gain Stage
70 - 3000 MHz

Rev. V1

MAAL-010200 is a GaAs MMIC amplifier in a lead-free SOT-89 surface mount plastic package. The MAAL-010200 employs a monolithic 1-stage self-biased design featuring a convenient 50 Ω input/output impedance that minimizes the number of external components required. Its broadband design provides usable performance from 500 to 3000 MHz. For operation below 500 MHz contact M/A-COM Technology’s application group for support.

Features
- Low Noise Figure
- High IP3
- Single Supply +3 V, +5 V
- RoHS* Compliant SOT-89 Package

Handling Procedures

The following precautions should be observed to avoid damage:

Static Sensitivity

Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these devices.
Typical Performance Curves: $V_{DD} = 3\text{ V}$

- Drain Current (mA)
- $+25\, ^\circ C$
- $-40\, ^\circ C$
- $+85\, ^\circ C$
Typical Performance Curves: $V_{DD} = 5 \text{ V}$

6. This device can run from a single 5 volt supply, but for 1M hour MTTF the output power must be no greater than 10 dBm unless using a series resistor on the drain. See Application note 7 on page 7.
Lead-Free SOT-89†

† Reference Application Note M538 for lead-free solder reflow recommendations.

Meets JEDEC moisture sensitivity level 1 requirements.

Plating is 100% matte tin over copper.

Application Schematic @ 5V

7. The addition of a 27 Ω series resistor on the drain line allows for 5 volt operation above 10 dBm output power, but no greater than 22 dBm of output power.
