MAAL-011111

Low Noise Amplifier
22 - 38 GHz

Features
- 19 dB Small Signal Gain
- 2.5 dB Noise Figure
- Single 3.3 V Bias
- Lead-Free 3 mm 16-Lead PQFN Package
- 100% RF Tested
- RoHS Compliant

Description
The MAAL-011111 is a three stage 22 - 38 GHz GaAs MMIC low noise amplifier. This device has a small signal gain of 19 dB with a noise figure of 2.5 dB.

This lead-free, 3 mm QFN package requires only a single positive bias supply. The devices uses MACOM's GaAs transistor technology, ensuring high repeatability and uniformity.

The device is well suited to multiple receiver applications which require broadband performance with simple bias requirements and the ease of volume manufacturing with 3 mm QFN packaging.

5. Exceeding any one or combination of these limits may cause permanent damage to this device.
6. MACOM does not recommend sustained operation near these survivability limits.
7. Channel temperature directly affects a device's MTTF. It is recommended to keep channel temperature as low as possible to maximize lifetime.

Handling Procedures
Please observe the following precautions to avoid damage:

Static Sensitivity
Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these Class 1A devices.

Recommended Board Layout

(DXF file available from website)

8. Ground plane conductor should be removed under the corners of the package, as shown.

Biasing - The device is operated with a single, positive bias supply. The device performance is insensitive to changes in bias condition; however, gain and power handling can be slightly improved with higher bias conditions without significantly affecting the noise figure performance. Typical biasing conditions within the specified performance ranges are $V_D = 3\, \text{V}$, 50 mA, $V_D = 3.3\, \text{V}$, 55 mA, $V_D = 3.6\, \text{V}$, 60 mA.
Lead-Free 3 mm 16-Lead PQFN†

† Reference Application Note S2083 for lead-free solder reflow recommendations.
Meets JEDEC moisture sensitivity level 1 requirements.
Plating is 100% matte tin plating over copper
