MAAVSS0001

2.25 V Voltage Variable Absorptive Attenuator, 42 dB
1.8 - 2.5 GHz

Features
- Single Positive Voltage Control, 0 to +2.25 Volts
- 42 dB Typical Attenuation Range at 2.4 GHz
- Low DC Power Consumption
- Lead-Free SOT-25 Package
- 100% Matte Tin Plating over Copper
- Halogen-Free “Green” Mold Compound
- 260°C Reflow Compatible
- RoHS* Compliant Version of AT-119

Description
M/A-COM's MAAVSS0001 is a GaAs MMIC voltage variable absorptive attenuator in a lead-free SOT-25 surface mount plastic package. M/A-COM fabricates the MAAVSS0001 with a proven monolithic GaAs 0.5 micron gate process that features full chip passivation for performance and reliability.

Applications
The MAAVSS0001 is ideally suited for applications that require fine tuning, linear attenuation with voltage, and very low power consumption.

Typical applications for the MAAVSS0001 include automatic gain control circuits in satellite radio receivers and other wireless receivers.

4. External DC blocking capacitors are required on all RF ports.
5. VCC = +3.3 V @ 50 µA typical. \( V_{CTL} = 0 \) V to +2.25 V @ 50 µA typical.

**Handling Procedures**

Please observe the following precautions to avoid damage:

**Static Sensitivity**

Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these devices.
