Description
The MADL-011012 is a lead-free surface mount, high power limiter which integrates the equivalent of 20 PIN, Schottky, limiter diodes, capacitors, inductors, and resistors in a compact ceramic package. This device provides superior low and high signal performance from 0.3 - 1.0 GHz without DC bias.

The MADL-011012 is ideally suitable for higher peak and CW power receiver-protector microwave circuits applications where higher performance surface mount limiter assemblies are required.

4. Exceeding any one or combination of these limits may cause permanent damage to this device.
5. MACOM does not recommend sustained operation near these survivability limits.
6. Operating at nominal conditions with \(T_J \leq +175°C\) will ensure MTTF > 1 x 10⁶ hours.
