MADL-011014

320 W Peak Power Limiter
1 - 2 GHz

Features
- +55 dBm Peak Power Handling @ +85°C
- +53 dBm CW Power Handling @ +85°C
- 0.35 dB Insertion Loss (1.2 - 1.4 GHz)
- 19 dB Return Loss (1.2 - 1.4 GHz)
- +19 dBm Flat Leakage Power
- Lead-Free 10.1 x 6.2 x 3.2 mm³ Package
- RoHS* Compliant and 260°C Reflow Compatible
- Hermetic Seal

Description
The MADL-011014 is a lead-free surface mount, high power limiter which integrates the equivalent of 19 PIN, Schottky, limiter diodes, capacitors, inductors, and resistors in a compact ceramic package. This device provides superior low and high signal performance from 1 - 2 GHz without DC bias.

The MADL-011014 is ideally suitable for higher peak and CW power receiver-protector microwave circuits applications where higher performance surface mount limiter assemblies are required.

Ordering Information

4. Exceeding any one or combination of these limits may cause permanent damage to this device.
5. MACOM does not recommend sustained operation near these survivability limits.
6. Operating at nominal conditions with $T_J \leq +175°C$ will ensure MTTF > $1 \times 10^6$ hours.

Handling Procedures
Please observe the following precautions to avoid damage:

Static Sensitivity
These devices are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these HBM Class 1C devices.

Lead-Free 10.1 x 6.2 x 3.2 mm³ 2-Lead package†

† Reference Application Note S2083 for lead-free solder reflow recommendations.
Plating is Au over Ni over Cu.
