

Multi Purpose Axial Leaded Glass Schottky Diodes

V2

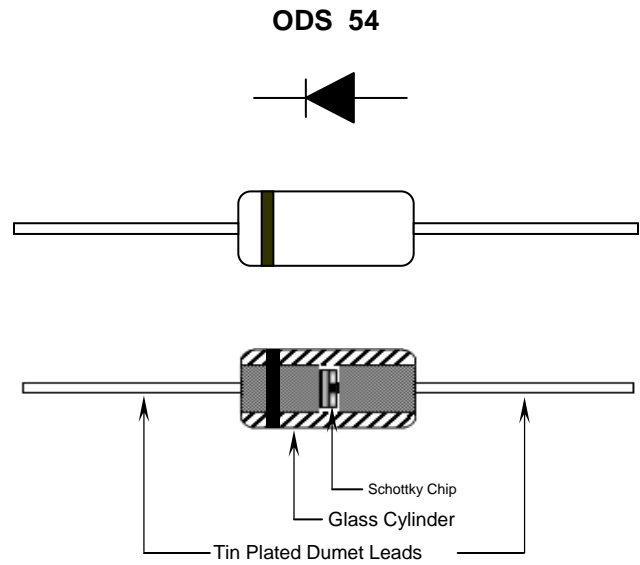

Features

- ◆ Glass Hermetically Sealed Packages
- ◆ Picosecond Switching
- ◆ Low Leakage Current
- ◆ Offered in Tape and Reel Packaging
- ◆ RoHS Compliant

Description and Applications

These Schottky diodes are designed to have picosecond switching speed and are housed in a hermetic axial lead glass package. These devices are designed for use in a variety of applications including mixing, detecting, and switching at both low and high power levels. They can also be used in commercial switching and control functions particularly in narrow band receivers. They can also be used in low frequency applications such as shaping, sampling, and as gates.

Glass Package Style

Absolute Maximum Ratings

T_{AMB} = +25°C (Unless Otherwise Noted) ¹

Parameter	Absolute Maximum
D.C. Reverse Voltage	(See Table)
Operating Temperature	-65°C to +200°C
Storage Temperature	-65°C to +200°C
Installation Temperature	+230°C for 5 Seconds
Power Dissipation Listed Below Will De-Rate Linearly to 0mW at 135°C	
Case Style 54	250mW

Ordering Information

Part Number	Package	Standard Quantity
MA4E2811	ESD Bags	Bulk
MADS-002811-00540T	Tape and Reel	1500
MA4E2812-54	ESD Bags	Bulk

Notes

1. Operation of this device above any one of these parameters may cause permanent damage.

Assembly Recommendations

- Leads on axial leaded devices must be formed while being held firm. Bending the leads too close to the body of the part may cause internal damage to the device. Bends <0.060" from body are not recommended. Appropriate fixturing should be used.
- Devices may be soldered using standard 60/40, Sn/Pb or RoHS compliant solders. Axial leads are tin plated, 50µM, thick to ensure an optimum connection.

* Specifications subject to change without notice.
