MAMX-011035

Double-Balanced Mixer
5.5 to 19 GHz

Features
- Low conversion loss: 6 dB
- Wide IF bandwidth: DC to 6 GHz
- IIP3 +21 dBm at 15 dBm LO drive
- High isolation
- Lead-Free 3 mm 12-lead QFN package
- Lead-free and RoHS* Compliant

Description
MAMX-011035 is a GaAs double-balanced passive diode mixer housed in a lead-free 3 mm, 12-lead QFN package. The mixer offers low conversion loss, high linearity and a wide IF bandwidth. The double-balanced circuit configuration provides excellent port isolation while internal 50 Ω matching simplifies its application.

This mixer is well suited for applications such as test and measurement, microwave radio and radar.

5. All specifications refer to down-conversion operation, unless otherwise noted.

Handling Procedures

Please observe the following precautions to avoid damage:

Static Sensitivity

These electronic devices are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these devices with the following rating:

- HBM Class 1B
- CDM Class C5

Assembly Information

- Do not subject the device to excessive force, especially at elevated temperatures > 60°C.
- No-clean flux is required for assembly. Post SMT washing is not recommended.

6. Exceeding any one or combination of these limits may cause permanent damage to this device.

7. MACOM does not recommend sustained operation near these survivability limits.

8. Operating at nominal conditions with $T_J \leq +150^\circ\text{C}$ will ensure $MTTF > 1 \times 10^6$ hours. Thermal resistance, $\Theta_{JC}$ is $85^\circ\text{C/W}$.
Double-Balanced Mixer
5.5 to 19 GHz

Typical Performance Curves

Conversion Loss USB (Down Conversion)
@ +25°C, I_F = 100 MHz

Conversion Loss USB (Up Conversion)
@ +25°C, I_F = 100 MHz

Conversion Loss
Over Temperature, I_F = 100 MHz

IF Bandwidth
@ +25°C, F_LO = 10 GHz, P_LO = 15 dBm
