Features
- Low Conversion Loss: 6 dB
- Wide IF Bandwidth: DC to 6 GHz
- IIP3 +21 dBm @ 15 dBm LO Drive
- High Isolation
- Lead-Free 3 mm 12-lead QFN Package
- RoHS* Compliant

Applications
- Test & Measurement
- Microwave Radio
- Radar

Description
MAMX-011067 is a GaAs double-balanced passive diode mixer housed in a lead-free 3 mm, 12-lead QFN package. The mixer offers low conversion loss, high linearity and a wide IF bandwidth. The double-balanced circuit configuration provides excellent port isolation while internal 50 Ω matching simplifies its application.

This mixer is well suited for applications such as test and measurement, microwave radio and radar.

</tbody>
</table>

6. Exceeding any one or combination of these limits may cause permanent damage to this device.
7. MACOM does not recommend sustained operation near these survivability limits.
8. Operating at nominal conditions with \(T_J \leq +150^\circ C\) will ensure MTTF > 1 x 10\(^9\) hours. Thermal resistance, \(\Theta_{JC}\), is +85°C/W.

Handling Procedures
Please observe the following precautions to avoid damage:

Static Sensitivity
These electronic devices are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these devices with the following rating:
HBM Class 1B
CDM Class C3
