**MAOC-009265**

**Voltage Controlled Oscillator**

9.4 – 10.8 GHz

---

**Features**
- Low Phase Noise
- Wide Tuning Range
- Divide-by-Two Output
- Integrated Buffer Amplifier
- Excellent Temperature Stability
- +5V Bias
- Lead-Free 5 mm 32-Lead PQFN Package
- Halogen-Free “Green” Mold Compound
- RoHS* Compliant and 260°C Reflow Compatible

**Description**

The MAOC-009265 is an InGaP HBT-based voltage controlled oscillator for frequency generation. No external matching components are required. This VCO is easily integrated into a phase lock loop using the divide-by-two output. The extremely low phase noise makes this part ideal for many radio applications including high capacity digital radios.

The MAOC-009265 primary applications are Point-to-Point Radio, Point-to-Multipoint Radio, Communications Systems, and Low Phase Noise applications.

The 5 mm PQFN package has a lead-free finish that is RoHS compliant and compatible with a 260°C reflow temperature. The package also features low lead inductance and an excellent thermal path.

**Ordering Information**

</tbody>
</table>

4. Exceeding any one or combination of these limits may cause permanent damage to this device.
5. MACOM does not recommend sustained operation near these survivability limits.
6. Operating at nominal conditions with \( T_J \leq +135^\circ C \) will ensure MTBF > 2.5 x 10^8 hours.
7. Junction Temperature \( (T_J) = T_C + \Theta_{JC} \times (V^*I) \)
   Typical thermal resistance \( (\Theta_{JC}) = 35^\circ C/W. \)
   a) For \( T_C = 25^\circ C, T_J = 56^\circ C @ 5 \, V, 175 \, mA \)
   b) For \( T_C = 85^\circ C, T_J = 117^\circ C @ 5 \, V, 180 \, mA \)

Handling Procedures
Please observe the following precautions to avoid damage:

Static Sensitivity
Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these devices.

ESD Rating: Class 1A

Lead-Free 5 mm 32-Lead PQFN†

NOTES:
1. Reference JEDEC MO-220-VHHD-5 for additional dimensional and tolerance information.
2. All dimensions shown as in/mm.

† Reference Application Note S2083 for lead-free solder reflow recommendations.
Meets JEDEC moisture sensitivity level 3 requirements.
Plating is 100% matte tin over copper.
