Description
M/A-COM’s MAPDCC0014 is an IC-based monolithic power splitter/combiner in a low cost SOIC-16 plastic package. This device is ideally suited for applications where PCB real estate is at a premium and standard packaging for automated assembly and low cost are critical. Typical applications include infrastructure, portables, and peripheral devices (PCMCIA cards) for wireless standards such as PCS, PCN, DECT, PHS, and DCS-1800. Available in Tape and Reel.

The MAPDCC0014 is fabricated using a passive-integrated circuit process. The process features full-chip passivation for increased performance and reliability.
