Surface Mount GaAs Tuning Varactor

Features
- Hyperabrupt Tuning Varactor
- Small Profile Surface Mount Package
- RoHS Compliant Package
- Supplied on Tape and Reel

Description
The MAVR-011005-12790T diode is a hyperabrupt tuning varactor with constant gamma from 2 to 12 volts. This device offers a large capacitance ratio and high quality factor. It is offered in the surface mount, RoHS compliant, plastic SC-79 package.

Applications
In addition to the electrical characteristics of the MAVR-011005-12790T the small package size and minimal package parasitics (0.6nH package inductance) make these parts attractive for tuning applications where the optimum combination of very wide tuning range and high quality factor is required.

Absolute Maximum Ratings $^{1,2}$
@ $T_A=+25 \, ^\circ C$ (Unless Otherwise Noted)

Surface Mount GaAs Tuning Varactor

Case Styles

SC-79 (Case Style 1279)

Mounting Information

The illustration indicates the recommended mounting pad configuration for the SC-79 packages. Solder paste containing flux should be screened onto the pads to a thickness of 0.005-0.007 inches. The plastic package is placed in position, firmly adhering to the solder paste.

Permanent attachment is performed by a reflow soldering procedure during which the tab temperature does not exceed +275 °C and the body temperature does not exceed +250 °C, for standard models and +260 °C for the RoHS compliant devices.

Please refer to Application Note M538 for surface mounting instructions.
