Active Doubler
2.5 - 6.0 / 5.0 - 12.0 GHz

Features
- Octave Bandwidth Operation
- +16 dBm Output Power
- -35 dBC Fundamental Leakage
- +5 V, 125 mA Bias
- Lead-Free 4 mm 24-lead QFN Package
- 100% RF, DC and Output Power Testing
- RoHS* Compliant and 260°C Reflow Compatible

Description
The XX1002-QH is a 2.5 - 6.0 / 5.0 - 12.0 GHz QFN active doubler that delivers +16 dBm of output power. The device combines an active doubler with an output buffer amplifier that delivers constant power over a range of input powers. The device has excellent rejection of the fundamental and harmonic products and requires a single positive bias supply.

This device uses MACOM’s GaAs HBT device technology to ensure high reliability and uniformity. The device comes in a low-cost 4 mm QFN surface mount plastic package offering excellent RF and thermal properties and is RoHS compliant.

This device is specifically designed for point-to-point radio applications and is well suited for other telecom applications such as SATCOM and VSAT.

</table>

4. Exceeding any one or combination of these limits may cause permanent damage to this device.
5. MACOM does not recommend sustained operation near these survivability limits.
6. Operating at nominal conditions with $T_J \leq +150^\circ C$ will ensure MTTF $> 1 \times 10^6$ hours.
7. Junction Temperature ($T_J = T_C + \Theta_{JC} \times (V \times I)$)
   Typical CW thermal resistance ($\Theta_{JC}$) = 77°C/W

Biasing

The device is operated by biasing $VCC = 5$ V which will draw typically 102 mA quiescent / 125 mA under RF drive. The device requires by-passing as shown in the recommended layout with $C1 = 1$ nF and $C2 = 1$ µF.

Handling Procedures

Please observe the following precautions to avoid damage:

**Static Sensitivity**

Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these Class 0 (200 V HBM) devices.

---

1. References Application Note S2083 for lead-free solder reflow recommendations.
2. Meets JEDEC moisture sensitivity level 1 requirements.
3. Plating is 100% matte tin over copper.
