Customer Notification M02046G-15/25 Production Release

Dear Valued Customer:

This notification is for the purpose of informing you of Mindspeed's release of the M02046G-15 and M02046G-25 products to production status. The product release status prior to this was prototype and identified as M02046G-15P and M02046G-25P.

Purpose

Production status identifies the part as having a completed production test solution on automatic test equipment; completed process qualifications, package qualifications, electrostatic discharge, latch-up qualifications; and completed product characterization analysis.

Production status also provides full warranty for the product per the Mindspeed Terms and Conditions document.

Change Schedule

This change occurred on September 15, 2005 for the M02046G-15 and July 25, 2005 for the M02046G-25. Product shipped after these dates that is marked as prototypes, M02046G-15P and M02046G-25P, are considered full production and will have full warranty per Mindspeed's Terms and Conditions document.

Method to identify parts

After the utilization of inventory marked as prototype, the product will no longer have the "P" suffix on the part number. Shipping dates and lot numbers will be used for traceability purposes for product that ships after the dates shown above but is still marked with the "P" suffix.

Customer Impact

Full warranty of product is provided with this change.

We are confident this change will allow Mindspeed Technologies to maintain its high standards for quality and reliability. We will be managing this change very closely to ensure minimum disruption to our customers. If, at any time, you have a need for further information, please contact your local Sales Representative.
