The M21012/11/01 are high-performance quad multi-rate clock and data recovery (CDR) arrays, optimized for multi-lane telecom and datacom applications. Each CDR operates independently at bit rates between 42 Mbps and 3.2 Gbps, allowing maximum flexibility in system design.

Signal conditioning features include adaptive input equalization and output pre-emphasis, allowing robust reception and transmission of signals to other devices up to 60" away.

User-selectable input interface types allow DC-coupled input to CML, LVDS, and LVPECL. The outputs can also be DC-coupled to CML, LVDS, and LVPECL.

Frequency acquisition is accomplished with an external reference clock. The built-in frequency synthesizer allows multi-rate operation, while operating with a single reference clock.

The device can be controlled either through hardwired pins or an I2C-compatible interface. The hardwired mode eliminates the need for an external micro-controller, while allowing control of the key features of the device. The I2C-compatible interface allows complete control of the device features.
**Product Applications**

- SONET OC-1, OC-3, OC-12, OC-48 systems and modules
- Fibre Channel (1x, 2x, 10x) systems
- Gigabit Ethernet systems
- 10GBASE-CX4/LX4 XAUI systems & modules
- ESCON, FDDI, systems and modules
- Backplane reach extension
- Add drop multiplexers (ADM)

**Ordering information**

- Number: M21012 (42 Mbps – 3.2 Gbps)
  - M21011 (1 Gbps – 3.2 Gbps)
  - M21001 (42 Mbps – 800 Mbps)

- Package data: 72-terminal, 10 mm, MLF
