Customer Notification

M21250-12 and M21250G-12 Pre-production Release

Dear Valued Customer:

This notification is for the purpose of informing you of Mindspeed's release of the quad-video-reclocker product to pre-production status. The M21250G-12 version is the ROHS compliant version of the video reclocker. The product release status prior to this was prototype and identified as M21250-12P and M21250G-12P.

Purpose

Pre-production status identifies the part as having a completed production test solution on automatic test equipment as well as completed process qualifications, package qualifications, electrostatic discharge, and latch-up qualifications; and completed initial product characterization analysis.

Pre-production status also provides full warranty for the product per the Mindspeed Terms and Conditions document.

Change Schedule

This change has occurred on September 9, 2005. Product shipped after this date that are marked as prototypes, M21250-12P and M21250G-12P, are considered pre-production and will have full warranty per Mindspeed's Terms and Conditions document.

Method to identify parts

After the utilization of inventory marked as prototype, the product will no longer have the "P" suffix on the part number. Shipping dates and lot numbers will be used for traceability purposes for product that ships after September 9, 2005 but is still marked with the "P" suffix.

Customer Impact

Full warranty of product is provided with this change.

We are confident this change will allow Mindspeed Technologies to maintain its high standards for quality and reliability. We will be managing this change very closely to ensure minimum disruption to our customers. If, at any time, you have a need for further information, please contact your local Sales Representative.
