Customer Notification

M21260-12 and M21260G-12 Pre-production Release

Dear Valued Customer:

This notification is for the purpose of informing you of Mindspeed's release of the 4X4 crosspoint with integrated video-reclocker to production status. The M21260G-12 version is the ROHS compliant version of the 4X4 crosspoint. The product release status prior to this was prototype and identified as M21260-12P and M21260G-12P.

Purpose

Production status identifies the part as having a completed production test solution on automatic test equipment as well as completed process qualifications, package qualifications, electrostatic discharge, and latch-up qualifications; and completed initial product characterization analysis.

Production status also provides full warranty for the product per the Mindspeed Terms and Conditions document.

Change Schedule

This change has occurred on February 20, 2006. Product shipped after this date that are marked as prototypes, M21260-12P and M21260G-12P, are considered production and will have full warranty per Mindspeed's Terms and Conditions document.

Method to identify parts

After the utilization of inventory marked as prototype, the product will no longer have the "P" suffix on the part number. Shipping dates and lot numbers will be used for traceability purposes for product that ships after February 20, 2006 but is still marked with the "P" suffix.

Customer Impact

Full warranty of product is provided with this change.

We are confident this change will allow Mindspeed Technologies to maintain its high standards for quality and reliability. We will be managing this change very closely to ensure minimum disruption to our customers. If, at any time, you have a need for further information, please contact your local Sales Representative.
